TAD TOWELS

Through Air Dry Technology

Premium Quality

Highly Absorbant

Softer than Conventional Towels

TAD technology removes water during production by pulling high temperature air through the sheet. By using air, paper manufacturers are able to maintain the fiber thickness and provide up to twice the bulk and absorption capacity for the same basis weight. TAD only uses virgin fibers providing a premium, softer product. With an emboss formed during the process, TAD provides users with a product ideal for cleaning spills, wiping down surfaces and hand drying.

M610 TAD Roll Towel
Size: 10"
